Building 4 Printers

Print to PDF (Default)

New Local Printer Add a new printer which is directly connected to your computer.

New Network Printer Add a new printer which is connected to your home network or on the Internet.

New Special Printer Add a new special printer such as a Fax or PDF by specifying an executable command.

New Printer Class Add a new printer class to specify a group of computers to print to.

Each button would launch the installation dialog or wizard appropriate for that kind of printer.

Default Printing Options

Page size: US Letter

Paper type: Recycled Paper

Orientation: Portrait Landscape

Print order: Collate Reverse

Advanced Options...

Currently, the KDE UI takes care of all these options in the Instances section (Printer profiles), but the universally common ones should be broken out in to here.

Additional specialty options can be hidden in a new dialog via a [More options...] button.
